

Amendments to the Claims

This listing of the claims will replace all prior versions, and listings of claims in the application.

Listing of Claims:

1. (Currently Amended) A system for broadcasting requested pieces of music utilizing an information system, comprising: ~~characterized in that~~

user terminals and a web server ~~are~~ connected through an Internet;

a database in which data of pieces of music that can be requested are stored is connected to said web server;

a broadcasting system for transmitting at least ~~sounds, images, pieces of music, texts and so on and~~ said broadcasting system connected with said database through a management server;

one or more ~~[[a]]~~ computers ~~for~~ ~~[[a]]~~ staff ~~are~~ connected ~~to~~ with said database through ~~[[a]]~~ said management server~~[[;]]~~.

wherein said web server receives selections from among said pieces of music requested by said user terminals~~[[;]]~~, and said management server computes classified totals~~[[;]]~~, and wherein pieces of music selected with a click or automatically at said one or more computers ~~for~~ ~~[[a]]~~ staff are ~~broadcasted~~ broadcast by said broadcasting system.

2. (Currently Amended) ~~[[A]]~~ The system ~~for broadcasting requested pieces of music utilizing an information system according to~~ as claimed in claim 1, wherein said ~~requests~~ selections are made using buttons for voting for requested pieces of music displayed on screens of said terminals.

3. (Currently Amended) ~~[[A]]~~ The system ~~for broadcasting requested pieces of music utilizing an information system according to~~ as claimed in claim 1, wherein names, addresses, ages and messages are written and inputted at the time of said ~~requests~~ selections.

4. (Currently Amended) ~~[[A]]~~ The system ~~for broadcasting requested pieces of music~~

~~utilizing an information system according to~~ as claimed in claim 3, wherein the times of requests, information on requested pieces of music[[,]] and messages ~~and so on~~ are transmitted by mail to said one or more computers for the staff when said requests are received.

5. (Currently Amended) [[A]] ~~The system for broadcasting requested pieces of music utilizing an information system according to~~ as claimed in claim 1, wherein said classified totals of pieces of music are obtained for each genre and wherein pieces of music in each genre specified by said one or more computers for the staff are ~~broadcasted~~ broadcast.

6. (Currently Amended) [[A]] ~~The system for broadcasting requested pieces of music utilizing an information system according to~~ as claimed in claim 4, wherein the at least dates and times of the broadcasts ~~and the like~~ are transmitted to the requesters by mail when said pieces of music are ~~broadcasted~~ broadcast.

7. (Currently Amended) [[A]] ~~The system for broadcasting requested piece of music utilizing an information system according to~~ as claimed in claim 1, wherein a printer is connected to said management server to print data associated with said ~~broadcasted~~ broadcast pieces of music.

8. (New) A method for broadcasting requested pieces of music utilizing an information system, the method comprising:

connecting user terminals with a web server through an Internet;

storing data of pieces of music that can be requested in a database;

connecting said database to said web server;

connecting a broadcasting system for transmitting at least said pieces of music with said database through a management server;

connecting one or more computers for staff with said database through said management server;

receiving selections from among said pieces of music requested by said user

terminals at said web server;

computing classified totals in said management server; and

selecting pieces of music with a click or automatically at said one or more computers for staff for broadcast by said broadcasting system.

9. (New) The method as claimed in claim 8, further comprising

making selections using buttons for voting for requested pieces of music displayed on screens of said terminals.

10. (New) The method as claimed in claim 8, further comprising:

inputting names, addresses, ages and messages.

11. (New) The method as claimed in claim 10, further comprising

transmitting times of requests, information on requested pieces of music and messages by mail to said one or more computers for staff when said requests are received.

12. (New) The method as claimed in claim 8, wherein computing classified totals comprises:

obtaining classified totals of pieces of music for each genre; and

broadcasting pieces of music in each genre specified by said one or more computers for staff.

13. (New) The method as claimed in claim 11, further comprising:

transmitting at least dates and times of the broadcasts to the requesters by mail when said pieces of music are broadcast.

14. (New) The method as claimed in claim 8, further comprising:

connecting a printer to said management server to print data associated with said broadcast pieces of music.
